

Vantage

Quick Start

A task app for those of us that hate task apps.

These are the basic features to get you started. The full feature list is in **Settings** → **How to Use Vantage**.

ADD A TASK

1. Voice. Push and hold until you're done. Vantage sorts the information for you.

2. Type. Same, but you type in the information.

3. Amber fields with a "?" are guesses — tap to confirm. Flip **Calendar** on to also add the task to your calendar.

4. Siri. Say "Hey Siri, add a task in Vantage," and follow the prompts to capture tasks on the run.

5. Task List. Tasks show up here — tap the circles to add them to Today's Plan.

6. Task details. Tap a task name to see its details, add more info, or turn it into a Note.

PLAN YOUR DAY

7. Today's Plan. Hides the tasks you didn't select for today's plan.

8. Pick for Me. Tell Vantage how much time you have, and it picks tasks based on urgency and due date.

9. Drag the three lines to reorder your selected tasks.

FOCUS MODE

10. One task at a time, with a timer. Cycle between tasks — each pauses until you return. No estimated duration yet? Set it here too.

NOTES

11. Anything can become a Note instead of a task, and back again — search notes, or group them by category or project.

REVIEW

12. Review has five parts:

Looking Back — what you did recently.

Needs Attention — things you might forget, or that are overdue.

Looking Forward — what's coming up in the next week or so.

Make Adjustments — add goals and link tasks to them so you can track your progress.

Vantage Noticed — patterns Vantage sees over time — when you're productive, how your completions are trending, and more.

SETTINGS

13. What's in Settings:

- Daily task reminder — on / off / time
- Reset dismissed hints
- Category-guessing on or off
- Back up, restore, and export your data
- Restore a recently deleted item
- Task text size
- Completion sound, and how long completed tasks are kept
- Customize project colours
- Delete a project
- Share feedback

Check it out when you're ready.

ADDITIONAL FEATURES *(See Settings → How To for details)*

- **Categories & Projects** — organize tasks by where you'll do them, or what project they're for
- **Goals** — capture your goals or dreams, link tasks to them, and track your goal progress
- **Subtasks** — break a task down into smaller subtasks
- **Depends on** — make a task depend on another one — it stays hidden until the first task is done
- **Recurring tasks** — mark a task as recurring, and set how often and when it reappears in the list
- **Calendar** — add a task with a due date (or date and time) to your default calendar with one tap
- **Sort & group** — sort tasks by duration, due date, and more; group notes by category or project
- **Search** — search tasks by task name, or notes by note name
- **Widget** — see your next few tasks right on your Home Screen or Lock Screen
