

Vantage

Quick Start

A task app for those of us that hate task apps.

These are the basic features to get you started.

The complete feature list in **How to use Vantage**, along with the toggle between **Simple** and **Full** modes, are in **Settings**.

SIMPLE AND FULL MODES

ADD A TASK

1. Task List. Tasks show up here — tap the circles to add them to Today's Plan.

2. Voice. Push and hold until you're done. Vantage sorts the information for you.

3. Type. Same, but you type in the information.

4. Parsed fields are blue; Vantage's guesses are amber — tap to confirm or edit. Flip **Calendar** on to also add the task to your calendar.

5. Siri. Say "Hey Siri, add a task in Vantage," and follow the prompts to capture tasks on the run.

6. Task details. Tap a task name to see its details, add more info, or turn it into a Note.

7. 3 ways to finish it: tap **Task Completed** on its detail page, long-press it in the list, or tap **Complete** in Focus Mode.

NOTES

8. Anything can become a Note instead of a task, and back again — search notes, or group them by category or project.

SETTINGS

9. What's in Settings:

- Set daily reminders
- Adjust hints and preferences
- Manage projects
- Back up / restore your data
- Send us feedback
- Find the How to use Vantage guide

Check it out when you're ready.

FULL MODE ONLY

PLAN YOUR DAY

10. Today's Plan. Shows only the tasks you selected so you can focus on today.

11. Pick for Me. Tell Vantage how much time you have, and it creates a plan that fits, based on urgency and due dates.

12. Drag the three lines to reorder your selected tasks.

FOCUS MODE

13. One task at a time, with a timer. Cycle between tasks — each pauses until you return. No estimated duration yet? Set it here too.

REVIEW

14. Review has five parts:

Looking Back — what you did recently.

Needs Attention — things you might forget, or that are overdue.

Looking Forward — what's coming up in the next week or so.

Make Adjustments — add goals and link tasks to them so you can track your progress.

Vantage Noticed — patterns Vantage notices in how you work over time.

ADDITIONAL FEATURES *(See Settings → How to use Vantage for details)*

- **Categories & Projects** — organize tasks by where you'll do them, or what project they're for
- **Goals** — capture your goals or dreams, link tasks to them, and track your goal progress
- **Subtasks** — break a task down into smaller subtasks
- **Depends on** — make a task depend on another one — it stays hidden until the first task is done
- **Recurring tasks** — mark a task as recurring, and set how often and when it reappears in the list
- **Calendar** — add a task with a due date (or date and time) to your default calendar with one tap
- **Sort & group** — sort tasks by duration, due date, and more; group notes by category or project
- **Search** — search tasks by task name, or notes by note name
- **Widget** — see your next few tasks right on your Home Screen or Lock Screen
